1. *Scholarship index*: the product of the number of credits and the grade of the courses taken in the semester divided by the number of credits taken. In calculating the scholarship index, the grades and credits achieved in compulsory and optional subjects are weighted by 1.2. The scholarship index is calculated on the basis of the results of all the subjects taken in the previous semester according to the following formula:

$$\frac{\sum 1,2 \times \text{credit}^K \times \text{merit}^K + \sum \text{credit}^V \times \text{merit}^V}{\sum 1,2 \times \text{kredit}^K + \sum \text{kredit}^V}$$

where

- C: all compulsory, compulsory optional subjects in the recommended curriculum
- A: optional subject taken according to the recommended curriculum.

Courses ending with an unsatisfactory or "failed", "failed to pass", "failed to pass" or "failed to appear" are marked with zero in the numerator of the formula. Merit marks obtained in the context of additional (parallel) student status at another higher education institution, during internal parallel studies or by crediting previous studies are not counted in the scholarship index. The scholarship index also includes subjects taken within the framework of subject retakes, whereas subjects taken within the framework of remedial retakes (remedial revision of a previously completed subject) are not included. Courses taken in the framework of a visiting student status, regardless of whether they were taken in the framework of a visiting student status with a higher education institution in the country or abroad, shall be considered as having been taken at the University and shall be included in the value of the scholarship index with the credits and grades approved by the Credit Transfer and Validation Committee. Courses required for Master's degree students in the context of a credit recognition procedure from a bachelor's degree course and taken in parallel with the course leading to a Master's degree and professional qualification shall not be counted in the scholarship index.

2. *Corrected credit index*: the corrected credit index is based on the provisions of the Government Decree No. 87/2015 (IV. 9.) on the implementation of certain provisions of Act CCIV of 2011 on National Higher Education, Article 57 (4) ... The corrected credit index is calculated from the credit index by multiplying it by a factor corresponding to the ratio of credits completed during the semester to the number of credits undertaken in the individual curriculum (...) In calculating the credit index, the sum of the credit value and the grade multiplied by the number of credits in the subjects completed during the semester is divided by the thirty credits to be completed in one semester, in the case of average progress.

3. *doctoral scholarships*: grants per person as defined in Section 114/D (1) (b) of the Nftv. for participants in doctoral studies.

³Repealed by Senate Resolution 93/2024 (VII. 17.).

If the applicant has both a registered domicile and a registered residence, his/her address is the one where he/she normally resides, as declared by the applicant in a private document with full probative value (FNY). In the absence of a declaration, the registered domicile is considered to be the applicant's address.

In order to prove that the applicant is living with other persons at the address, a certificate issued by the District Office of the District Office of the Metropolitan Government Office not older than three months - or a document of equivalent content issued by the notary - is required, stating who is registered in the property at the applicant's address (hereinafter referred to as the "certificate of address"). If the certificate of residence also includes a person who is no longer a member of the household (e.g. a brother or sister who has moved away), this must be confirmed by a declaration made to a notary or notary public. The declaration must state that the person concerned is living at an address other than the applicant's address.

In order to prove that the Applicant is living with other persons at the registered address (where the Applicant lives), a certificate issued by the District Office of the District Office of the District Office of the Metropolitan Government Office, issued not more than three months ago, or a document of equivalent content issued by the notary, is required, stating who is registered in the property at the Applicant's address.

NATIONAL SCHOLARSHIPS FOR HIGHER EDUCATION

Evaluation criteria

National scholarship applications for higher education will be ranked according to a 200-point system, with a maximum total of:

- a) 120 points can be awarded for academic performance,
- b) 60 points are awarded for professional activity and
- c) 20 points are awarded for public, sporting, cultural and other activities.

The maximum number of points for each category may not be exceeded if the sum of the points awarded under the sub-categories listed within the category is greater.

Assessment of academic performance

Academic performance is calculated **on the basis of the simple arithmetic average of the student's results in the last two active semesters of study, calculated as specified in this Call for Applications (hereinafter referred to as the "National Higher Education Scholarship Average")**. If the student's last active semester is a consecutive internship semester, the average of the last two active semesters preceding the last active semester shall be taken into account.

To be considered when applying active semester study as a result of system, the scholarship index for the student is taken into account.

a Neptun-

The detailed rules for the calculation of the scholarship index are set out in § 3 (4) 1. is set out in.

If in either of the student's last two active semesters the scholarship index is less than or equal to 4.3, will not be eligible for a national higher education scholarship.

No points will be awarded for academic achievement below a national higher education scholarship average of 4.5. A 4.5 National Merit Scholarship average is worth 60 points and a 5.0 National Merit Scholarship average is worth 120 points. If the average is between the two thresholds, the number of points that can be obtained is calculated according to the following formula:

Academic performance score= 60+ [(national higher education scholarship average - 4.5) x 1.2 x 100]

where:

60 is the minimum score

4.5 is the minimum national average for higher education scholarships at which points can be awarded 1.2 is the number of points per hundredth

100 is the multiplier needed to determine the actual score.

The general rounding rules apply to the academic performance score and to the rounding of the average national higher education grant, with the second decimal place being obtained by rounding.

The scholarship average of the last two active semesters is certified by the department responsible for the academic administration of the course (Academic Department). The document certifying the academic record must be uploaded as an annex to the application, indicating the type of document.

²⁶⁴ Inserted by Senate Resolution 92/2022 (VII.13.). Established by Senate Resolution 93/2024 (17.VII.).
